

CHESTERS STABLES

AT HADRIAN'S WALL

Chesters Stables Sustainability Policy

Chesters Stables is committed to reducing its environmental impact. The below outlines the current 'green' credentials with a recognition that more is required:

Development

All apartments were developed using the original stable complex, a much more sustainable practise than a demolition and rebuild, as recognised by professionals from the Built Environment.

Online

The Walwick Estate Hotels app provides guests with a guest directory, reducing paper printouts.

During Your Stay

The car park is equipped with four electric charging points to entice guests to travel sustainably.

The business also encourages guests to make use of the extensive recycling facilities on property.

Reusable water bottles are provided to enjoy during your stay.

Other

Laundry is done on-site, as opposed to using external providers.
